

Ku24 News Aggregation

KEEP INFORMED

You need to stay informed. You have your own collection of online news services and competitor web sites, which you depend on for up-to-date market intelligence.

Online information sources are timely and convenient, but only if you regularly check them for new news. We offer an easier way to keep up-to-date with your essential online information.

Ku24 can give you access to news headlines from virtually any website, updated hourly, and delivered to a simple news ticker at the top of your PC screen. Stay informed with a glance—click on a headline to view the full story*. You can even include news sources from your own intranet on the ticker**.

HOW MUCH DOES IT COST?

For us to set up the news feeds and configure your news tickers for you, costs you £50 + VAT annually for each website monitored (minimum of five). You can install the system on as many machines as you wish.

NOTES

Supported operating systems: Windows 9x, Windows NT, Windows 2000/XP. Always-on internet connection required.

Ku24 Limited has no affiliations with any online news service. We can not guarantee that any or all of the sites you choose, or news feeds derived from them, will be accurate, up-to-date, or available at any given time.

* For subscription-based services, you will need a current subscription from the service provider to permit click-through to full stories.

** If your intranet system generates an RSS 0.91-compatible feed.
